Nimble – Instructions to Run

Installing the app

To run Nimble successfully two apk files must be installed in smartphone or emulator. To successfully run all the features of Nimble we recommend it installing on two smartphones rather than emulator (only because there is need of mobile camera).

Files:

1. Nimble.apk
2. DemoPSP.apk

Both the files have been tested on phone Google Nexus 4 with Android version 5.1.0 and API version 22.

Details for DemoPSP

- Minimum Sdk version: 21
- Compile Sdk version: 23

Details for Nimble

- Minimum Sdk version: 21
- Compile Sdk version: 23

DemoPSP app is just a dummy PSP at that responds to intents with data set as "upi:/pay". Other PSP app can also be used. We have deep linked our Nimble as explained "NPCI Common Library.pdf". Nimble is independent of the implementation DemoPSP app.

After installing both apps, please watch the demonstration video and demonstration document.
